

CourtLog is Canada's leader in Integrated Voice Management for the justice system. Already installed in more than 1,000 Canadian courtrooms, CourtLog provides state-of-the-art audio court session recording with its scalable and powerful software. This cost-effective solution for courts and tribunals makes voice recording easier while maximizing resources and improving efficiency for judges, lawyers and the legal community work processes.

CourtLog offers the most advanced all-in-one solution!

This easy-to-use and learn software puts business intelligence in the hands of the legal professionals by streamlining the time spent on the recording and data entry process, improving overall time management, decreasing costs and directly

Capture high-quality verbatim record

Whether you need to record court or administrative procedures, depositions or any other judicial session requiring accurate voice recording, CourtLog is a must! This software-based solution lets you record, annotate, archive, search and playback court sessions recordings. Our flexible digital court recording solution can be used from a desktop or laptop computer for out-of-court sessions allowing the legal personnel to be more effective in their work. The system also enables the integration of log notes and the monitoring of 2 or 4 audio channels, depending on the court requirements and will allow the duplication of recordings. CourtLog requires minimal training and offers only superior sound quality without noise distortion. For better space management, files can be compressed and sampled in multiple formats.

Instant access to recordings

Safely stored on the CourtLog central server, the recordings can be accessed by the authorized court personnel from a remote location or any court workstation via a LAN/WAN. Thanks to the Web search and playback interface, recordings can be accessible at any time and from any place which dramatically increases the work efficiency!

CourtLog Interface

CourtLog's intelligent search parameters make instant file and case retrieval of relevant recordings possible, even while court is in session. The annotations of each recording are automatically and precisely time stamped with the audio to facilitate the search of specific speakers, events or key words. This enables court personnel to easily retrieve audio recordings, without having to manually search on an aging tape recorder for extensive minutes.

Built-in CD duplication

The CourtLog player has a built-in CD burner, thereby providing protection against data loss and also eliminating unnecessary time spent downloading software to playback recordings. Replacing your bulky cassette tapes with CDs will significantly reduced your storage space but will also prevent the lost of important information caused by damaged tapes.

CourtLog offers a wide range of features

- Instant access to audio recordings for playback
- Search & playback from anywhere with a Web interface
- Superior sound quality
- Extensive search criteria
- Client/server decentralized structure
- Fully LAN/WAN compatible
- Precise time referencing
- 2 or 4-channel recording
- Playback while recording
- Rapid duplication of selected parts of recordings
- 2 or 4-channel recording
- Integrated with case/docket management
- User & Group management
- Multilingual interfaces
- Archive to CD, DVD or the networked CourtLog server
- Works in conjunction with major databases (MS SQL server, Oracle) and with Windows 2000 and XP, TCP/IP compliant

Novo Technologies is a leading innovator and supplier of flexible, cost-effective and adaptable call recording and quality monitoring solutions for contact centers. With its leadership in the development and integration of new software solutions, Novo is dedicated to help organizations to proactively and effectively capture and manage corporate transactional content. Consequently, organizations are able to extract business intelligence from customer interactions thus providing their clientele with the best customer experience.

For the last 15 years, Novo Technologies has experienced remarkable growth and received numerous awards for its innovations. To this day, Novo has been serving its advanced technology and superior service to hundreds of organizations worldwide. Its solutions are implemented in contact centers of all sizes coming from a variety of industries in North America; among which are the top leaders in the Canadian financial and insurance industries.

Other Novo Technologies Solutions:
